

EnCompass Ready Data

SEAMLESS INTEGRATION FOR OPTIMIZED ANALYSIS

EnCompass-Ready Data is a comprehensive, pre-configured dataset tailored for seamless integration with EnCompass software. It incorporates your portfolio data with the nine pre-solved scenarios of Horizon's Energy Advisory Outlook. These scenarios range from maintaining the current policy and technology landscape to exploring variations in natural gas production and CO₂ limitations, the introduction of a national carbon tax, and fluctuations in energy demand driven by economic growth or enhanced energy efficiency.

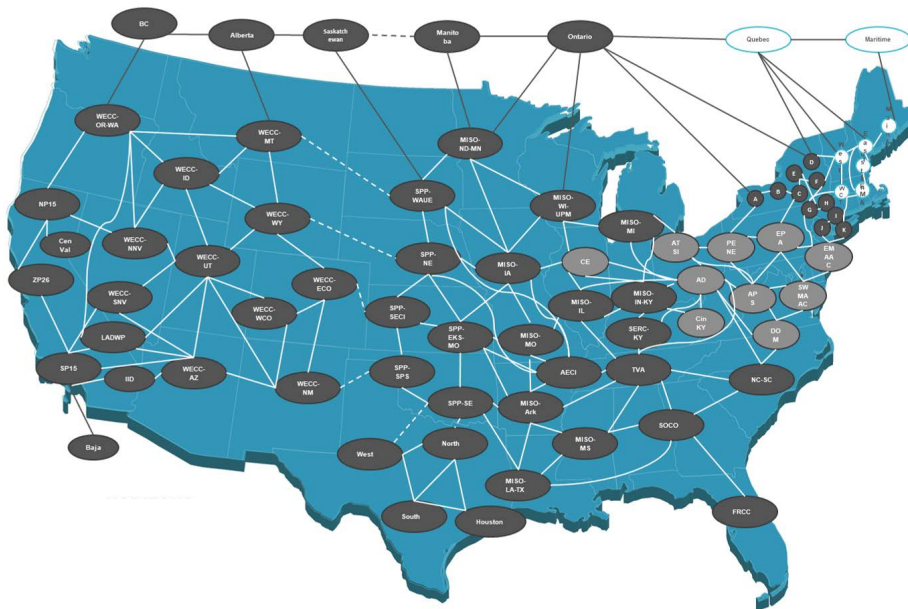

The dataset includes daily fuel prices, 8,760 hourly energy prices in EnCompass format, and annual capacity prices, all curated and regularly updated by industry experts. Scenarios provide flexibility, accommodating various factors like fuel and carbon prices, demand, distributed generation, and capital costs.

Choosing EnCompass-Ready Data streamlines analysis by incorporating your portfolio data, supporting informed decision-making.

Features

- Ready-to-use data reduces the time needed for data preparation, allowing quicker insights.
- Experts vet and validate data to ensure precision in your models.
- This includes all relevant market data, guaranteeing you don't miss any critical information.
- While pre-configured, the data is flexible enough to accommodate specific modeling requirements.

DATA INSIGHTS THAT POWER YOUR BUSINESS

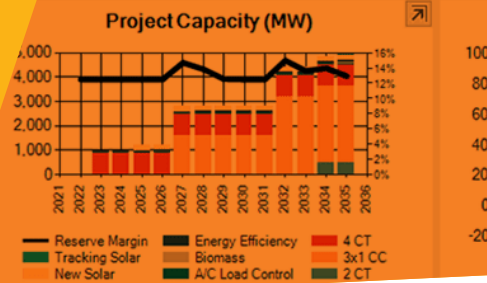

Use Cases

- Predict future market trends and pricing with greater accuracy.
- Optimize resource allocation based on reliable data inputs.
- Stay ahead of FERC and other regulatory mandates with up-to-date data.

About Yes Energy's Partnership with Horizons Energy

Yes Energy partners closely with Horizons Energy to offer customers accurate long-term, energy market outlooks by integrating extensively researched market fundamentals with advanced modeling tools, supported by decades of market, financial, regulatory, and forecasting domain expertise.

	Net Imported (MW)	Reserve Margin (%)	Price (\$/kWh-yr)	(\$/MWh)
8	869	12.50%	73.06	50.22
969	149	12.50%	76.76	51.62
976	603	12.50%	79.17	54.32
1,182	699	12.50%	79.97	56.60
1,188	915	12.50%	80.24	59.49
2,786		14.70%	0.00	58.73
2,790		13.84%	0.00	61.68
2,794		12.55%	0.00	65.14
2,797	416	12.50%	85.18	69.97
2,801	737	12.50%	88.63	74.15
4,392		14.98%	0.00	73.53
